

STAGED TO SELL

THE ERA REAL ESTATE HOME STAGING GUIDE

Welcome

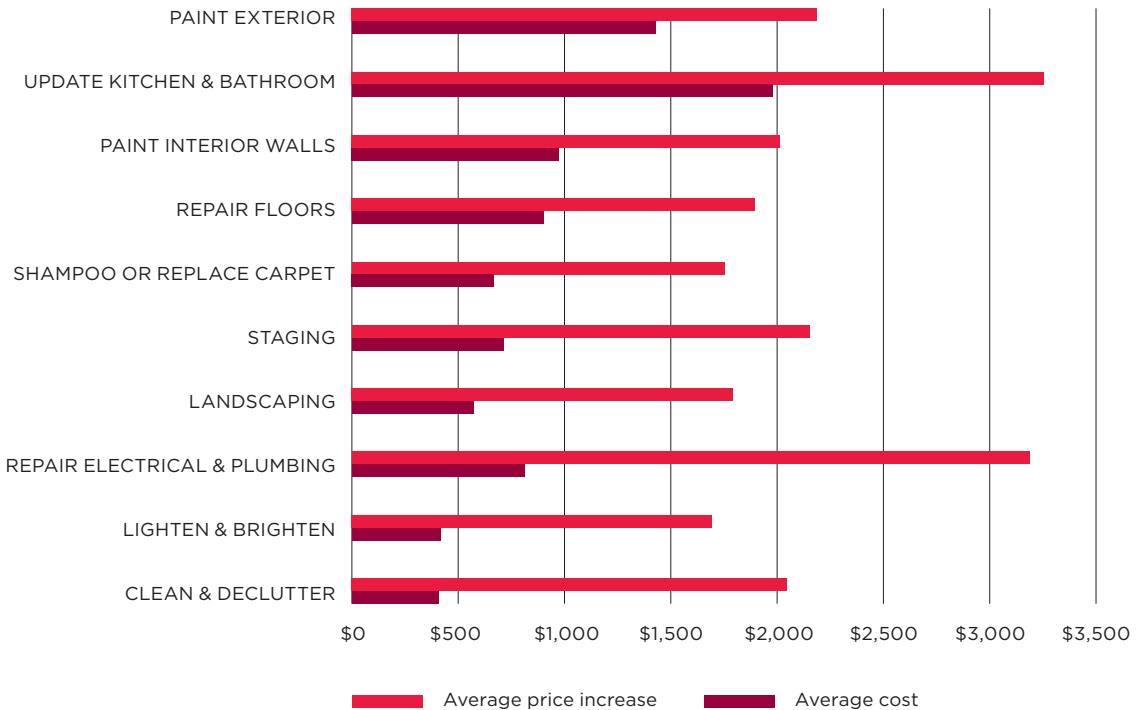

When you home stage, you highlight what you like about your home so that it becomes what a buyer will love about your property. You can achieve this through solid planning based on proven staging principles. We're about to show you how.

WHAT IS HOME STAGING?

When you put your house on the market, it becomes a product that's for sale. Through home staging, you can create an attractive, organized space that will make a great first impression and help potential buyers visualize themselves living there.

Why Stage?

Home staging will help you sell your home faster. And at the highest price possible. The statistics confirm it. Here's how much you can expect to increase the value of your home, by home improvement category.

From HomeGain's 2012 National Home Improvement Survey

STAGED HOMES SPEND 88% LESS TIME ON THE MARKET WITH 95% SELLING IN 11 DAYS OR LESS ON AVERAGE, AND FOR 17% MORE.*

*Based upon a survey conducted by the International Association of Home Staging Professionals® and StagedHomes.com® of over 1,000 homes (62% vacant, 38% occupied) across the continental U.S. and Canada that were prepared for sale by Accredited Staging Professionals (ASP®).

BEFORE YOU START

- Look at your house through a buyer's eyes. Decide what's appealing and what's distracting. Get a friend to help you be more objective.
- Make the positive aspects of each room stand out.
- Remove most personal possessions. Buyers don't want to feel like they're intruding.
- Create an atmosphere that's genuine and not overly forced.

Setting the Stage

Staging your home systematically allows you to plan and prepare your property for sale. We suggest going room by room and that you do not stage the entire house at once. Follow these 14 steps and you'll be done before you know it.

1. Assess the room

How is it used and can it be used for any other purpose?

2. Take inventory

What stands out about the room? Pick a focal point and draw attention to it.

3. Remove clutter

Do one room at a time, going from small spaces to larger ones. Box up all non-essentials, including closet clutter.

4. Depersonalize

Remove personal collections and most pictures. Make your property appealing to the largest pool of buyers.

5. Renew, repair, replace

Fix the little things that make buyers wonder, "What else is wrong?" Before doing renovations, check in with your ERA[®]-affiliated sales associate.

6. Rearrange furniture

Minimize furniture in dining rooms, bedrooms and living rooms. Whatever you remove can go into storage or in other rooms.

7. Re-accessorize

Highlight the focal point of each room. You may need to go back to items you removed from one room to add to another.

8. Fine-tune your work

Concentrate on details and revisit your focal points. If the focal point still isn't clear, revisit steps 1 through 7.

9. Clean, clean, clean

Straighten closets and clean inside kitchen and medicine cabinets. Assume buyers will look in every nook and cranny.

10. Add life

Use potted plants or a bowl of fruit. A touch of nature always livens up a home.

11. Target high-impact rooms

Concentrate on the rooms buyers value most. In order of importance, they are: the living room, kitchen, master bedroom, dining room, bathroom, children's bedroom and guest bedroom.

12. Borrow design concepts

Generate new ideas from magazines, real estate TV shows, Pinterest®, YouTube®, HGTV as well as from researching homes for sale, both physically and online.

13. Prepare to show

Get in the routine of showing your home. Follow our Showtime Game Plan (on page 20), to help present your house at its best.

14. Ask for help

Your ERA-affiliated sales associate can recommend storage facilities and assist with discounts on repair supplies. Ask before you act.
